Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a multilayer film, classified in class 428, subclass 480+.
 - II. Claims 19-20, drawn to a first method of making a multilayer film, classified in class 264, subclass 173.11+.
 - III. Claims 21-22, drawn to a second method of making a multilayer film, classified in class 156, subclass 297+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I; III and I are related as process(es) of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as extrusion coating.
3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, wherein Invention II involves combining layers of molten polymers, while Invention III involves bonding of preformed layers.

Art Unit: 1773

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Due to the number of groups, this restriction requirement has been made in written form.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
